

ABVE Membership Directory Website Project:

For an investment of \$1700, Flash Avenue offers to create a custom coded online membership directory for abve.net with the following search functions:

- Display results similar to a Google-style search function with autofill pre-population suggestions while typing in the search field which generates a list of most probable results.
- Search filtering based on "Name" OR "Area of Practice" OR "State" with a broader range of possible results shown. [As opposed to "Name" AND "Area of Practice" AND "State" which has been too restrictive; generating fewer or no results.]
- Maintain the hierarchy of result preference for "01-Diplomate; 02-Diplomate/IPEC; 03-Fellow; 04-Fellow/IPEC; etc."

BTF would have to manually upload all new members to this system and set a routine to update it after our membership renewals drive to ensure that the directory is current.
